Recommendations (optional): In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

It is my recommendation that Botium Toys' implement the following security measures to reduce the risk of security breaches, lost of productivity, and possibly imposed fines from government agencies:

Administrative/Managerial Controls

- *Reduce the number of staff members who have access to internally stored data and customer's PII/SPII. Currently all employees have access to this data. **(Least Privilege)***
- *While there currently is a password policy, it does not meet the current minimum password complexity. Update this policy to meet the recommended standards. **(Password policies)***

Technical Controls

- *There are currently no Backups of the company's systems. I recommend a full backup incase of a breach. This would allow the company to restore/recover information from an event. **(Backups)***
